ISO 27032:2023 Cybersecurity Management System

What is ISO 27032?

ISO 270032:2023 provides a set of cybersecurity guidelines to protect information, manage cyber risks and threats, and maintain trust in digital environments.

Objectives of ISO 27032

The objectives of ISO 27032 are the following:

- **Information Protection:** The standard focuses on protecting confidential, integral and available information, including personal data, intellectual property, financial information and other critical assets.
- **Risk Management:** It establishes guidelines to identify, assess and mitigate cybersecurity risks, including threats such as malware, phishing, denial of service (DDoS) attacks, ransomware and other vulnerabilities.
- **Cyber Resilience:** The standard helps organisations develop the ability to recover quickly and effectively from a cyber security incident.
- **Continuous Improvement:** A proactive approach to the continuous improvement of cyber security management is promoted by regularly reviewing and updating security measures.
- ISO 27032:2023 is applicable to any type of organisation, regardless of size, sector or location.
- It can be used independently or as a complement to other information security management standards, such as [ISO/IEC 27001](ISO/IEC 27001).

What are the benefits of the ISO 27032:2023 for customers?

ISO 27032:2023 certification benefits customers in the following ways:

Greater Security of Information

With the protection of personal data: ISO 27032:2023 helps organisations protect their customers' personal data, including information such as names, addresses, telephone numbers, financial and medical information.

Fraud and Cyber Attack Prevention

Implementation of the standard reduces the risk of customers falling victim to fraud, identity theft and other cyber attacks.

With increased confidence in the security of transactions, customers can be confident that their online transactions are safe and secure.

Improved Transparency and Confidence

Organisations implementing ISO 27032:2023 are committed to being transparent with their customers about how their information is protected.

With greater trust in the organisation, customers can have greater confidence in organisations that are committed to protecting their information securely.

Why get ISO 27032:2023-certified Cybersecurity Management System with Applus+ Certification?

[Applus+ Certification](#) is an independent and recognised body whose objective is to help organisations achieve their commitment to continuous improvement.

We analyse the needs of our clients so that our auditors, specialists in each sector of activity, can provide a service that brings maximum value when assessing compliance in your organisation.

Our teams develop specific certification plans based on the structure, processes and activities of our clients.

Our international presence, extensive product portfolio and accreditations enable us to provide a global, expert service tailored to your organisation's needs.
