

# ISO 45001 – Occupational health and safety

## Who can be certified by ISO 45001?

Occupational Health and Safety (OHS) management systems with ISO 45001 provide a framework for managing risks and opportunities, preventing injury and health impairment to workers and providing safe, healthy workplaces. It is critically important for organisations to eliminate hazards and minimise risks by taking effective preventive and protective measures.

Any organisation can implement and certify a management system under ISO 45001, regardless of its size or sector of activity.

## ISO 45001: Benefits

Accidents at work and occupational diseases affect the integrity of employees, but also have a considerable impact on organisations. Certifying companies under ISO 45001 offers the following benefits:

- Better management of incidents, making for a reduction of downtime
- Reduced insurance premium costs and overall costs of health and safety-related incidents
- Less absenteeism and lower turnover rate among workers
- Easier communication with suppliers, customers and partners in other countries
- Improvement of the company's image, reputation and greater legal certainty

- Better control of risks and improved occupational health and safety performance and results

## Why certify about ISO 45001 with Applus+ Certification?

Applus+ Certification is an independent entity of recognized prestige which aims to help organisations achieve their commitment to continuous improvement. We analyse the needs of our clients so that our auditors, specialists in each sector of activity, can provide a service that provides maximum value when carrying out management system audits.

Acting under the principles of independence and impartiality, with this certification we help to create an Occupational Health and Safety Management System based on minimising occupational risks, improving safety and working conditions globally.

ISO 45001:2018 has been based on the High Level Structure (HLS). Thanks to this unified structure, ISO 45001:2018 has a common, coherent and consistent core with respect to other revised standards such as ISO 9001:2015 and ISO 14001:2015, facilitating integration with other standards.
